

Piggy Bank Software

We should create a piggy bank application for school children to teach them importance of savings. They should have the option to :

- Add money
- withdraw money
- Check the current amount in the piggy bank

```
In [ ]: import piggy_bank
```

```
-----Start-----
```

```
Start or End : Start
```

```
Add , Withdraw or Check : Add
```

```
Add amount : 1000
```

```
After adding , your updated balance is 1000.0 rupees  
None
```

```
Start or End : Start
```

```
Add , Withdraw or Check : Withdraw
```

```
withdraw amount : 300
```

```
After withdrawing , balance amount is 700.0 rupees  
None
```

```
Start or End : Start'
```

```
Start or End : Start
```

```
Add , Withdraw or Check : Check
```

```
Your current balance is 700.0 rupees  
None
```

Assignment

Our piggy bank is working as expected. Can you think of some more functionalities and add them to the existing project which may help the school children.
